Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Styled Components

Backend: Node.js, Express.js, Nest.js, REST API Development

Database: PostgreSQL, NoSQL

Tools & Platforms: Git, WordPress, Stripe, SEO Optimization

Other: Responsive Design, API Integration, Agile Development

PROFESSIONAL EXPERIENCE

Full Stack Developer | Senior Assistance Services | Chicago, USA

Aug 2023 - Present

Contact: Christian Giannotti | +1 773-575-2100

- Developed and deployed a full-stack CRM system using React.js, Node.js, Express, and PostgreSQL, improving client communication and workflow automation
- Designed and built an MVP for a follow-up and referral web application using Next.js and Express.js, currently 70% complete
- Built and maintained RESTful APIs to support frontend-backend integration
- Optimized database performance using PostgreSQL, ensuring scalability and reliability
- Improved operational efficiency by 20%, contributing to over 200 successful client applications in 2 months
- Troubleshoot system issues, reducing downtime and ensuring consistent performance
- Managed and maintained company websites using WordPress, improving SEO and site performance

FREELANCE PROJECTS

Govinda's Restaurant Houston Web Application

Nov 2025 - Jan 2026

www.govindashou.com

Tech Stack: Next.js, Typescript, PostgreSQL, Tailwind CSS, Stripe, Framer Motion

- Designed and developed a full-stack restaurant platform using Next.js and TypeScript
- Integrated Stripe payment processing for online orders, catering services, and gift cards
- Built dynamic and responsive UI with Tailwind CSS and Framer Motion animations
- Implemented catering forms, order-now flows, and gift card systems to streamline operations
- Reduced dependency on third-party paid platforms by consolidating business operations into a single system
- Improved online sales by 30%+ through enhanced UX, optimized checkout flows, and SEO strategies
- Increased customer engagement and conversion rates with performance-optimized and mobile-friendly design

Jardin Infantil Creart Web App

Feb 2026 - April 2026

www.jardincreart.com

Tech Stack: Next.js, Typescript, Postgresql, Tailwind CSS, Framer Motion

- Designed and developed a custom CRM and business management web application to support enrollment, client tracking, and billing operations
- Built backend services using Node.js and implemented structured data management for student records and financial tracking
- Developed features for client relationship management, invoicing, and payment tracking, improving operational efficiency
- Increased revenue by improving customer follow-up processes and enrollment conversion rates through the CRM system
- Streamlined the organization's book of business, centralizing client data and improving visibility into operations
- Replaced manual processes with a digital billing platform, reducing errors and improving financial tracking accuracy

Makrorecycling Website

Nov 2024 - Present

www.makrorecycling.es

Tech Stack: NextJs, Typescript, PostgreSQL, Tailwind CSS, SEO, Stripe

- Designed and developed a business website for a metal recycling company to strengthen its digital presence and improve search engine visibility (SEO)
- Built a responsive and user-friendly interface using Next.js, React, and Tailwind CSS to clearly communicate services and business offerings
- Structured and optimized content to improve organic search rankings and online discoverability
- Implemented backend data handling with PostgreSQL, ensuring scalable and reliable data management
- Delivered a performance-optimized website with fast load times and mobile responsiveness

EDUCATION

Certificate in Software Development

Jan 2023 - Jul 2023

DigitalCrafts - Atlanta, USA

- Software engineering training program covering full-stack development including, but not limited to JavaScript, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

ADDITIONAL INFORMATION

- **Languages:** Spanish, English.
- **Certifications:** Front-End Developer Course (Platzi), Implementation of NoSQL Databases (SENA), Construction of Databases with MySQL (SENA).
